

ELEVIQ TECHNOLOGIES PORTFOLIO

MyHobbyPlan

Smart Lifestyle Planning Meets Hyper-Local Weather Intelligence

Interactive Pitch Deck: kigechaedward.github.io/Myhobbyplan-website

Investor & Partner Presentation • Confidential

The Problem & Market Gap

Fragmented User Experience

Modern consumers struggle to balance busy work lives with personal hobbies and outdoor recreation.

- **Unpredictable Weather:** Outdoor activities are frequently ruined by sudden meteorological shifts.
- **Disconnected Tools:** Calendar apps organize time without weather context. Weather apps show forecasts without planning utilities.
- **Inconsistency:** 68% of individuals report abandoning outdoor leisure routines due to poor scheduling and timing.

The Market Solution

MyHobbyPlan bridges the gap between schedule management and environmental conditions.

- **Contextual Intelligence:** Pairs personal hobby criteria directly with hyper-local weather APIs.
- **Automated Optimization:** Recommends optimal windows for outdoor recreation, sports, and wellness.
- **Unified Dashboard:** Replaces 3+ separate apps with one intuitive experience.

Native Android Application Stack

Core Features

- **Hobby Management:** Custom catalogs for personal activities.
- **Weather-Aware Planner:** Weekly & monthly dynamic views.
- **Custom Preferences:** Temperature, wind, and rain thresholds per activity.
- **Rewarded Forecasts:** Gamified engagement loops.

Tech Architecture

- **Language:** Kotlin (100% Native)
- **UI Framework:** Jetpack Compose & Material 3
- **Architecture:** MVVM Pattern
- **Database:** Local Room Persistence
- **API Integration:** OpenWeather REST API

Design Philosophy

Built with modern Material Design 3 guidelines offering smooth transitions, accessible dark mode, offline-first reliability, and minimal battery consumption through asynchronous Coroutines & Flow data streaming.

AI Vision & Strategic Expansion

AI-Powered Next-Gen Features

- **Predictive Activity Scheduling:** Machine learning models analyze historical weather and user habits to propose ideal weekly schedules.
- **Conversational AI Assistant:** Natural language interaction to ask "When's the best time for my run this week?" and auto-book slots.
- **Dynamic Micro-Climate Alerts:** Real-time atmospheric monitoring that alerts users to hyper-local weather windows.

Platform Expansion Plan

Phase 1

ANDROID LAUNCH &
COMMUNITY GROWTH

Phase 2

IOS APP & WEB APPLICATION
PORTAL

Phase 3

AI AGENT & PERSONALIZATION
ENGINE

Phase 4

B2B RECREATION & TOURISM
PARTNERSHIPS

Funding Ask & Partnership Goals

What We Are Seeking

Eleviq Technologies is seeking support from **Startup Accelerators, Grant Organizations, and Strategic Investors** to accelerate scale:

- **Engineering & AI Talent:** Expand core development team for iOS, Web, and ML integrations.
- **User Acquisition:** Launch targeted marketing campaigns for outdoor and wellness communities.
- **Ecosystem Partnerships:** Partner with outdoor gear brands, parks, and health initiatives.

Eleviq Technologies Vision

"Through Eleviq Technologies, our mission is to build digital products that turn technology into healthier, more active, and more connected real-world lifestyle experiences."
